Sustainability Strategy

First Meeting
2023 06 14

News!

We are proud to declare that we are making our **Sustainability Strategy** official.

What once were isolated actions aimed at controlling the effect our activities have upon nature, **now shall be a signed and sealed strategy** that all the departments shall aim to follow to the fullest.

Main points of the Sustainability Strategy

01

CO2

We have Higg MSI!

02

BIOBASED

New tool - Monitoring

03

REUSABLE

Why not reuse...water

04

REDUCTION

Modernizing equipment =
saving energy resources

05

CRS

“People first” approach

01

CO2

It's not only a trend!

IS HERE!

One of our biggest achievements this year is **the acquirement of Higg MSI assessment tool** that allows us to calculate the real impact our products have regarding:

- Global warming;
- Nutrient pollution in water (eutrophication);
- Water scarcity;
- Abiotic resource depletion, use of fossil fuels;
- Chemistry.

02

Biobased

The only way forward!

MONITORING

From this day forward we officially start monitoring the amount of recycled and biobased items we purchase and produce.

WHAT ARE WE MONITORING?

YARNS

How much recycled or biobased yarns do we buy.

FABRICS

How much fabrics that include recycled or biobased yarns do we produce.

PACKAGING

How much sustainable packaging do we acquire.

Why?

We are starting our monitoring process in order to **advocate, persuade our clients to choose materials that are made using:**

- **Renewable,**
- **Recycled resources or**
- **Resources that leave less footprint on our nature.**

OUR GOAL IS
TO SEE THE CHANGE
IN NUMBERS –
WE SHALL AIM FOR
THEM TO GROW

03

Reusable

What can be used more than once?

Water!

Did you know there is a way to **collect rain water** and use it again? To flush toilets, clean premises, water plants etc.

That's our goal!

We are **in the negotiations stage** with a Lithuanian company that invented a system to collect rain water and use it for other daily purposes.

©4

Reduction

It takes not only inventiveness, but a certain
humility as well!

30%

By **modernizing our boiler house** we are planning to reduce the amount of gas we need for our steamer up to 30%.

The steamer is used in the dyeing process of the fabrics, hence it is going to be **a huge positive impact on the environment.**

Already in process. **Scheduled to be finished in September.**

05

CRS

Showing love to our people!

ACTIONS SPEAK LOUDER THAN WORDS

FREEer FRIDAY

All our office finishes work at 2.30 pm on Friday, so we can have more free time for our own interests.

FREE SPORT

We can all go to the gym for free on Tuesdays and Thursdays during our working hours.

CERTIFIED

All our management processes are constantly checked via extensive ISO audits that we pass with flying colors.

TRACEBILITY

Our focus area at the time

That's something we've been working on since the day we decided to join the **RWS family**.

Taking it further means providing as much information to our clients and their clients about the products we produce.

We are currently in the state where we are deciding **how much information is truly necessary for the end consumer to have**.

Do we need to know the name of the person who designed, constructed our garment?

Are we only satisfied with the origin place of the garment or do we need to know the source of the yarns used as well?

We are ready to use QR codes on all our garments.

However, we are aware that the **sustainability of the digital space** should also be considered.

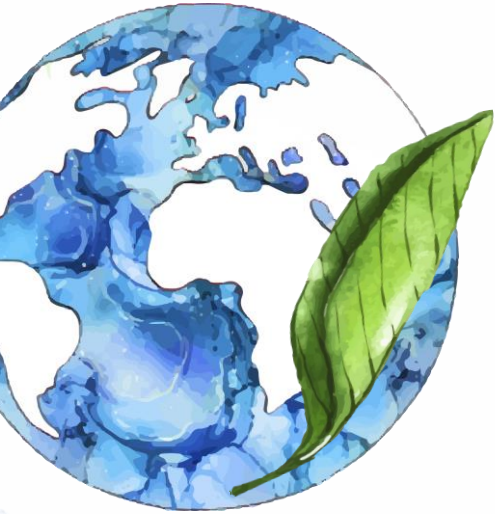

What's next?

Action Plan

Start using Higg ASAP	Responsible person – Quality Control Manager Reda Siudikiene
Finish modernizing boiler house	Responsible person – Director of Technical department Ramunas Damalakas
Decide upon acquisition of water collecting system	Responsible person – CEO Sigitas Zaikauskas
Begin monitoring purchases, production regarding recycled, biobased materials	Responsible people – Chief of Production Laimute Aniuliene, Head of Knitting Department Jolanta Joneliuniene
Look for ways to improve the daily life of people, to educate the team	Responsible person – HR Manager Ilona Santockyte
Think green!	Responsible people – ALL OF US ☺

Next meeting is due in
September, 2003

Let's start working!
